

근로복지공단

Figure 1 is a conceptual diagram illustrating the relationship between the number of people in a household (x-axis) and the number of people in a household who are 65 years of age or older (y-axis). The diagram shows that as the total number of people in a household increases, the number of people aged 65 or older also tends to increase, but at a slower rate, leading to a higher proportion of older adults in larger households.
